The Company will not be liable for the consequences of the error beyond the provision of the corrected reports and tabulations.

Executive Summary

Executive Summary

Introduction

- The objective of this research is to measure community satisfaction with Grey District Council and its services to inform and enhance Council performance long term in line with community outcomes in the Council's Long Term Plan. The research also provides a measure of perception of quality of life, in line with the Community Economic Development Strategy.
- This research commenced biennially in 2011 and became annual in 2014. The findings from 2021 are presented in this report and where applicable, comparisons are made with earlier findings.
- In 2021, interviews were conducted late November 2021 early March 2022, among a representative sample of 350 Grey District residents aged 18 and over.
- Prior to 2019, interviews were conducted by telephone. Since 2019, a hybrid online selfcompletion and telephone interviewer administered approach has been employed. This change in methodology has been introduced given the advent of cost-effective electronic interviewing options and a reduction in landline presence within the community.
- The move to a hybrid methodology for data collection in 2019 has resulted in some difference in satisfaction levels with the Council being recorded. These relate primarily to a change in methodology rather than a shift in satisfaction levels with the Council. However, the 2020 and 2021, compared with 2019, online participants responses are more aligned to those of the telephone interview participants.

Key insights

- Overall, satisfaction with the performance of the Mayor, Councillors and Council is lower in 2021 than 2020, but higher than 2019.
- A significant rates increase, and for some, a lack of effective communication justifying the increase are likely to have affected satisfaction in 2022.
- Most consider Council to be actively working for the District, doing a good job, moving forward and getting things done. There are a large number of favourable comments about the performance and leadership by the Mayor, in particular, and to a lesser extent, the Councillors and many Council departments.
- The Mayor, is widely praised for her commitment to the community, high level of visibility, ability to listen and respond to residents needs. However, there is a minority who are looking for more engagement.
- Councillors are often considered to be doing a good job but they have lower community visibility and engagement than many would like to experience.
- Satisfaction with the Mayor and Councillors is highest among females, nonratepayers and those who have lived all or most of their life in the District.

Key insights continued

- The Council is also described as offering good support, communication, consultation and is considered approachable and committed to the community. However, these are also aspects of Council performance that a minority criticise. Overall, this indicates there is a need to listen and engage more with the community, and in particular, with those residents with unresolved issues.
- Satisfaction with a number of aspects of Council, in 2022, have been identified to be interconnected, these include:
 - Level of satisfaction with the performance of the Council, the Mayor and Councillors
 - Information provided/received and Council consultation
 - Satisfaction with the service received when the Council was contacted in the last 12 months
 - Being satisfied with Council services
 - Feeling safe on local roads
 - Having a sense of pride in the District and it being considered a great place to live.

Overall satisfaction with Council performance

- Some 70% expressed satisfaction with the overall performance of Council in the last 12 months, this is significantly lower than in 2020 (81%) but significantly higher than in 2019 (63%). Dissatisfaction (21%) in 2021 is higher than in 2020 (10%) but at a lower level than 2019 (25%).
- Main reasons for satisfaction focus on the good performance of the Council overall; the Mayor doing or having done a good job; the Council offering good support, communication, consultation and being approachable and the Council moving forward and getting things done (27%, 15%, 10% and 7% of comments, respectively). Reasons for dissatisfaction centre around a lack of support/communication/ consultation/don't listen, the rates being dear/money could be better spent and dissatisfaction with Council performance overall (9%, 7%, and 5%, respectively).
- Over three quarters (76%) are satisfied with the performance of the Mayor and Councillors. This level of satisfaction is marginally lower than 2020 (82%) but higher than in 2019 (59%). Dissatisfaction in 2021 (16%) is higher than in 2020 (9%) but lower than in 2019 (19%).

Satisfaction with communications

- Satisfaction (80%) with the information received from Council is marginally higher than in 2020 (78%) and 2019 (77%).
- In 2021, 66% of residents expressed satisfaction that the Council consults with residents on important issues, while 23% are dissatisfied and 11% do not know. Satisfaction is marginally higher than 2020 (64%) and higher than 2019 (52%). Overall, there is a need to continue to work on improving levels of engagement and consultation with residents.
- Residents' preferred method for receiving information varies indicating the importance of using a range of communication means to effectively reach residents.
 - Most popular, especially among those aged 65+ and ratepayers, is the Council quarterly newsletter (55%)
 - This is followed by email communication, most preferred by 25 49 year olds (41%)
 - And, social media (35%), most preferred by 18 49 year olds and females and those living in towns
 - Preferred next is a letter or bulk mail out, preferred by 32%
 - The Council website is a preferred method for just under a quarter (23%) and most preferred by females and those living in towns
 - Newspapers is a preferred means for 16%
 - And, radio is preferred by 8%.

Contact with Grey District Council

- 61% had contacted Grey District Council in the last 12 months, this proportion is similar to previous years.
- Four fifths (80%) expressed satisfaction with the overall service from the Council Offices. Satisfaction is marginally higher than in 2020 (78%) and than in 2019 (76%).
- Reasons for contacting the Council in the last 12 months are primarily about rates (38%), dog/animal control/registration (37%) and building/planning/resource consent/permit (30%).
- Satisfaction by reason for contact, is highest for general licensing e.g. liquor licensing (100%), dog/animal control registration (94%), rates (90%), events related (88%), building/planning/ resource consent/permit (83%) and park/reserve/playground/skatepark and walking track (80%).
- Dissatisfaction by reason for contact, is greatest in relation to stormwater or flooding (71%), public toilets and restrooms (50%), the handling of complaints and enquiries about sewerage (43%) and roading issues (43%). Although a word of caution, the number responding is small meaning these findings are indicative only. Reasons for dissatisfaction centre around the Council not replying and inaction with resolving a problem.
- By means of contact, satisfaction is highest for walk in contact (91%) followed by phone (71%) and email (65%) and it is lowest for social media (48%). Those who walked in are more likely to be elderly and those who phoned are more likely to have dependent children. Of note, reason for contact did vary by method of contact.

Use and satisfaction with Council services

- Of all Council services, residents are most likely to have used or visited a rubbish dump/recycling facility (74%), a public toilet/rest room (68%), and a park or reserve (67%) in the last 12 months.
- In 2021, satisfaction with Council facilities and services is highest for parks and reserves including, walking tracks (84%) followed by the availability of public parking (75%), roading network (74%), cemeteries (71%), swimming pools (70%), public toilets and rest rooms (70%), the Westland Recreation Centre (70%) and libraries (66%).
- Dissatisfaction is greatest with the overall maintenance of footpaths (43% dissatisfied), and roads (38%), the roading network for the district (24%), availability of public parking (22%) and overall stormwater system (21%).
- 47% of residents are satisfied, 17% dissatisfied and 36% don't know with Council's regulation of land use throughout the District in 2021, this level of satisfaction has marginally improved since 2019.
- Issues primarily revolve around there being too much bureaucracy/red tape/rules and regulations/takes too long, the plan not being comprehensive/cohesive/inappropriate land use/outdated and a lack of consultation/informing the public.

- 89% have a Council supplied household waste collection service. Four fifths (80%) are satisfied with the household recycling collection service in general, this level of satisfaction is similar to 2020 (77%) and 2019 (80%).
- Nearly all (94%) continue to be satisfied that their household rubbish/recycling is collected on time.
- Consistent with recent years, 74% are satisfied with Council litter bins, recycling centre and recycling stations being kept clean and tidy.
- Since 2019, less than two thirds of participants' homes (61 62%) are on a Council water supply and 1 2%, are on both a Council and private water supply.
- 84% of residents on a Council water supply are satisfied with the water's appearance and taste in 2021, this proportion has increased since 2019 (72%). 90% are satisfied with the water pressure and flow, which is a marginal increase since 2019 (85%).
- In 2021, 54% of participants live in a town and 46% in a rural environment.
- 73% of residents living in a town are satisfied with the way their property drains stormwater in 2021, this is similar to 2020 (75%) and 2019 (73%). There do appear to be localised issues with drainage.

Quality of Life

- Four fifths of participants (80%) agree the District is a great place to live, this is a decline from 2020 (88%) but it is a slight improvement on 2019 (77%). Participants aged 65+ and those who have lived in the District all or nearly all of their lives are more likely to consider the district a great place to live.
- Reasons for it being a great place to live focus around it being friendly/sense of community, its beauty/natural/unspoilt outdoor nature and a good lifestyle/relaxed/ quiet/like living here as well as outdoor activities/bush/beach.
- 49% agree they feel a sense of pride in the way their District looks and feels. This proportion is the same as in 2020 and higher than in 2019 (41%). Those living in a town rather than rural environment are significantly less likely to feel a sense of pride. Participants aged 65+ and those who have lived in the District all or nearly all of their lives are more likely to feel a sense of pride.
- Those who do not feel a sense of pride primarily mentioned the District is run down, untidy and in need of better maintenance as well as issues with the transport system and roading and the CBD dying with lots of empty shops.

Sense of road safety

 Feeling safe on local roads (79%), this proportion has significantly declined since 2020 (86%). It is lowest in Kaiata/Dobson/Taylorville/Stillwater and also lower in Grey Valley/ Blackball/Lake Brunner.

Introduction

Background

- Since 2014, Opinions Market Research has conducted an annual Community Satisfaction Survey on behalf of Grey District Council to measure community satisfaction with the Council and its services.
- In addition, this survey measures peoples' perception of quality of life, in line with the Community Economic Development Strategy.
- **Prior to 2014, in 2011 and 2013, biennial surveys were conducted.**
- Each survey the questions are adapted to meet current needs. In 2020 and 2021, additional questions were added to assess satisfaction with contact with Grey District Council offices.
- This report presents the main findings of the research in 2021 and makes comparisons with earlier surveys, where applicable.
- 8 Benchmark data comparing Grey District Council's performance with other South Island District Councils is also included.
- Residents' verbatim comments to open questions are presented in a separate report.

14

Research Objectives

Overall objective

To measure community satisfaction with Grey District Council and its services to inform and enhance Council performance long term.

Specific objectives

- Measure and monitor over time community satisfaction with Council performance and the services it provides.
- **6** Gain an understanding and insight into aspects of services for improvement.
- Obtermine Council performance in relation to the community outcomes which form part of the Council's Long Term Plan (LTP).
- Provide a measure of perception of quality of life, in line with the Community Economic Development Strategy.

Research Methodology

- Each survey consists of a representative sample of 350 Grey District residents aged 18+, based on the latest Census data.
- Prior to 2019, interviews were conducted by telephone. Since 2019, a hybrid online self-completion and telephone interviewer administered approach has been employed. This change in methodology was introduced given the advent of cost effective electronic options and a reduction in landline presence within the community.
- Note, the move to a hybrid methodology for data collection in 2019 has resulted in some difference in satisfaction levels being recorded that relate primarily to a change in methodology rather than a shift in satisfaction levels with the Council.
- For the online survey component, Grey District Council used a number of different strands to promote the survey including newspaper, press releases, flyers physical (Grey District Library, Westland Recreation Centre and potentially in person) and email, networks (Tai Poutini Polytechnic, Schools, District Health Board, community organisations, local committees and sports clubs via Sport Canterbury/West Coast), radio, newsletters, New Coasters, TPP, Facebook and the Grey District Council website.

Research Methodology continued

- In 2021, 126 interviews were conducted by telephone and 251 surveys were completed online.
- As the online sample was self-selecting, the sample profile was balanced in terms of age, gender and location as far as possible within budget constraints, using the telephone interviewer administered component. Between the phone and online components the total sample size of 350 was achieved. Quotas were set for age, gender and area according to Census 2018.
- Online and telephone interviewing took place from 4th November 2021 7th March 2022.
- The 2021 questionnaire was based on previous questionnaires with the addition of questions to assess contact with Grey District Council offices.
- The statistical margin of error at a 95% confidence level for the total sample of 350 is ± 5.3%.

Research Methodology continued

- **All percentages are shown as whole numbers.**
- Where total percentage satisfied and dissatisfied scores are given these are calculated from the precise, non-rounded data for accuracy. These totals may therefore differ from the sum of categories as shown in the graphs.
- Demographic sub-group analysis has been conducted based on location, and findings are included in the report where there are significant differences.
- Sub-group analysis based on location, gender, age, life stage, ratepayer status, length of time in Grey District, occupation, ethnicity, and satisfaction with the overall performance of Council, with the Mayor and Councillors, with information received and with consultation is provided in a separate report.
- **Findings of interest have been highlighted as follows:**
 - Findings that are statistically higher compared with 2020 or other locations combined are highlighted as: or
 - Findings that are statistically lower compared with 2020 or other locations combined are highlighted as: or

Benchmark Data

- 8 Benchmark data have been provided for some key performance measures for comparative purposes.
- This benchmark data is indicative only. The surveys from which the data were obtained differ slightly in the methodologies used, such as:
 - O Differences in data collection method used, for example telephone, postal, face to face.
 - $\, \$ \,$ Minor differences in sample sizes.
 - **Minor differences in the wording of questions and the scales used.**
- Survey years are recorded on the graphs. The most recent data available has been reported, although this is not necessarily 2021.

Satisfaction with Council's Regulation of Land Use

Q. How satisfied are you with Council's regulation of land use throughout the District? By this we mean Council's policies including the District Plan and resource management processes and whether the development within the District is aligned with these policies. Some forms of land use regulations under these policies include regulations for subdivisions, land use and building development and the zoning of land.

 Don't know/NA Quite dissatisfied (3) Extremely satisfied (6) 		mely dissatisfi satisfied (4)	. ,	y dissatisfied (2) y satisfied (5)	% dissatisfied	% satisfied	Mean score

2011	25	12 7	49	14 2	10	65	4.04
				%			

Sample: 350

Note: In 2015 the clarification was worded slightly differently: By this we mean Council policy including requirement of permits and codes created to ensure private use of land resources are aligned with policy standards. Some forms of land use regulations including housing codes, regulations for subdivisions, zoning ordinances, and building codes.

Reasons For Satisfaction with Council's Regulation of Land Use, 2021

Q. What is the main reason, or reasons, for feeling satisfied with Council's regulation of land use throughout the District?
