Yes

My/our submission is that: (state in summary the nature of your submission. Clearly indicate whether you support or oppose the specific proposal, or wish to have amendments made, giving reasons)

I oppose the proposal.

I've watched the effect of the digger along the beach in Granity and thought the effect significant - this will be nothing compared to the effect on the coastal morphology of what will be moved in this mine.

The trucks will have a significant effect on the road between Westport and Greymouth, and further afield when they go to Nelson instead. they are in direct conflict with the cyclists and due to the narrow road and lack of passing places, are most likely to kill one soon.

Was this truck traffic taken into account when it was decided that the new tourist DoC centre at Punakaiki didn't need a proper pedestrian crossing.

the fallacy of restoration is being promoted here. On the surface this might seem reasonable as the area is already denuded of native forest,

I/we seek the following decision from the Local Authority:(give precise details)

Refuse the complete operation of the mine.

If operation is permitted, then the following conditions to apply

Animal pest control must be started at the same time as planting, and kept going in perpetuity past the mine closure

Work buses running to the site must allow the general public to board and be transported and deposited at any point requested along the route.

The applicant must pay for maintenance of the road and additional funds to be applied to the formation of a safe
